Art Unit: 3632

This is the first office action for serial number 09/814,126, entitled Bracket For Mounting Auxiliary Machinery to Vehicle Body, filed March 22, 2001.

Drawings

Figure s 1-4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Crotty, III 5,857,728. Crotty discloses a vehicle body mounting bracket (figure 10) comprising a first bracket (210) having a shaft supporting portion (216), engaging portion (236); a second bracket (160) having an engagement portion (182), an opening portion, a guide holding plate (181); fixing means (189); locking projection (230-232).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Crotty, III 5,857,728 in view of Jacquemin et al (Jacquemin) 5,975,617. Crotty discloses all of the limitations of the claimed invention except for the cylindrical body protruding from said first bracket obliquely upward. Jacquemin teaches that it is known to have a cylindrical body protruding from a first bracket obliquely upward (3). It would have been obvious to one having ordinary skill in the art at the time of the invention to have modified Crotty to have made the cylindrical body protruding from a first bracket obliquely upward as taught by Jacquemin to allow the bracket to resist detachment.

Allowable Subject Matter

Claims 4, 5, 9, and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
